S.N. 10/731,698

Art Unit: 1745

February 5, 2007

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-19,45-48, drawn to an electrical power plant, classified in class 60, subclass 39+.
  - II. Claims 20-44, drawn to a method of generating electrical power, classified in class 429, subclass 13.

The inventions are distinct, each from the other because of the following reason:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). As admitted in the subject matter of the present claims the process as claimed can be practiced by four distinct electrical power plants as recited in claims 1-18,19,45, and 46-48, respectively.

3. If invention I is elected, an election of species is required. This application contains claims directed to the following patentably distinct species of the claimed invention.

I-1, Claims 1-18, drawn to an electrical power plant comprising a fuel cell and a first reactant recycle system.

I-2, Claim 19, drawn to an electrical power plant comprising a fuel cell, a first reactant recycle system, a first flowpath, a second flowpath and a third flowpath.

I-3, Claim 45, drawn to an electrical power plant comprising a fuel cell, a first reactant recycle system, a fuel accumulator, a fuel separator and a mechanical pump.

I-4, Claims 46-48, drawn to an electrical power plant comprising a fuel cell and a first reactant recycle system comprising a first recovery chamber a second recovery chamber.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims is generic.

4. If invention II is elected, an election of species is required. This application contains claims directed to the following patentably distinct species of the claimed invention.

II-1, Claims 20-37, drawn to a method of generating electrical power comprising the steps of directing a first exit stream out of the fuel cell to a separator and separating at least a portion of a first reactant from the first exit stream to produce a first separated reactant stream.

II-2, Claims 38-44, drawn to a method of generating electrical power comprising the steps of discharging a first fluid out of the fuel cell and separating at least a portion of a first reactant from the first fluid in a separator.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims directed to invention II are generic.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
